***PROCESS COMMUNICATION MODEL® (PCM)**

Co-developed in the US by psychologist Dr. Taibi Kahler and the National Aeronautics and Space Administration (NASA) in the 70's to build complementary teams of astronauts and predict reactions under stress within these teams.

Process Communication Model® (PCM) is now the world's premier tool that is based on human behaviour and enables it's user to understand how and why people communicate.

More than 1 million people have been trained or coached by a worldwide network of over 2,200 Process Communication Model® certified trainers and coaches.
